

UNITY CHURCH OF MONTREAL

MINISTER'S LETTER

SPRING 2015

Dear Unity Friend

Globalization, a word that we hear often these days, didn't even exist in dictionaries until a few years ago. Globalization essentially concerns what is happening in the world on an outer level. But if we are going to respond wisely to the phenomenon, humanity must develop the sense of universality. Lyndon Johnson, 35yrs ago warned of this, saying "We hope that the world will not narrow into a neighborhood before it has broadened into a brotherhood."an awakened response of the individual human being.

PRESERVING IDENTITY IN UNITY, I want to make this our theme for the coming months, To practice inclusiveness, we must first know and establish our own clear identity, our beliefs. How do we practice that our religion is oneness, yet do not lose our identity, remaining individual consciousness, though one with all that lives or is.

Yes, we will explore these thoughts from different philosophical angles and on different levels of being as we study it in Unity.

How do we deepen our individuation process and individual consciousness and at the same time grow in our awareness that we are all one.

A fascinating journey to ponder. Come be part of it. Join us on Sunday at 11am for beautiful, uplifting music and teaching and on Tuesday at 6pm for our Healing Meditation

Lovingly and sincerely, Dr. Maya
